

**'Rave Culture Vol.3' brings you another set of five unique Construction Kits inspired by the sounds of Darren Styles, Axmo, Nightcore, Scott Brown and many more.**

**The sounds inside this pack can be also useful for hypertchno or any other electronic dance music genres.**

**Every single Kit is split up in the following parts:**

**MIDI:** Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

**One-Shots:** This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

**Stems Dry & Wet:** Essential Audio Media exported all the stems as 16-Bit WAV files so you can drag and drop them at once into your DAW and you'll have the full Kit. They also added a dry folder where the synths are without any effects so you can add you own reverb or delay settings.

**Loops:** In this Folder you'll find Stems that are also available as 4-8 Bar loops exported as 16-Bit WAV to give you more freedom to make any stem file fitting into your project.

**Presets:** Inside this folder you'll find the presets used in the Kits. Essential Audio Media have included presets for Spire, Serum & Sylenth1.

**Please note:** The vocals are for demo purposes only and are fully AI-generated, but they have been included as a bonus in this pack.
