

'Retro Pop Sessions Vol 1' by Essential Audio Media brings you a set of five Construction Kits featuring catchy vocal lines inspired by the revived sound of the 80s that is topping today's charts. This pack was inspired and influenced by artists such as David Guetta, Dua Lipa and The Weeknd.

The samples included in this pack can be also useful for bringing Dance, Electronica and Urban genres to a whole other level.

MIDI: Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

One-Shots: This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

Stems Dry & Wet: Essential Audio Media exported all the stems as 24-Bit WAV files so you can drag and drop them at once into your DAW and you'll have the full Kit. They also added a Dry folder where the synths are without any effects so you can add your own reverb or delay settings.

Loops: All Stems are also available as 4-8 Bar loops exported as 24-Bit WAV to give you more freedom to make any stem file fitting into your project.

Vocals: Here you'll find the vocal stems exported in 24-Bit WAV which are available as Wet and Dry. That means you can pick the dry version and set the reverb or delay effect you need for your own projects.

Presets: In this folder, you'll find the presets used in the Kits. Essential Audio Media have included presets for Spire and Sylenth1 plugins.

Product Details:

- 5 Construction Kits;
- 103 WAV Stems;
- 50 WAV Loops Including Drums, Synths, Bass & Pads;
