

BigEDM is making sure you have all your bases covered with their latest pack, Septagon Vocals.

In the contents of this hefty pack, you will find over 400 sounds. Club excitors, club movers, epic anthems, anticipating wind ups, explosive drops, and chill wind-downs. These custom sounds have been designed to suit the style of any genre, any atmosphere, and any location. Everything from soft nylon-stringed guitars, lowfi bass lines, concert piano stabs, critical staple drum loops, crisp metallic cymbals, group claps, even male and female vocal samples.

The melody, the bass lines, the leads, the electro snare, soothing kicks with sustain, strong pounding kicks, insane rhythmic cymbal loops, and cultural percussion. We are talking beauty and the beast all in one pack.

If you are always looking for the latest tricks or ways to explore a new genre inside you will find 5 kits that contain a master track and all of the sounds and presets used to design it. You dissect it, you add your style and put it back together again. Kits can be used as an interactive hands-on learning tool, as a way to break the writer's block, keep your skills current and even inspire you with a fresh approach to your mix.

And some unique style and true professional quality to your mix with sounds from Big EDM's Septagon Vocals pack.
