

Serum Future Progressive Volume 2

Containing 128 Serum Presets, this pack truly captures the legendary driving progressive sound as championed by world-class artists such as ARTBAT, CamelPhat, Cristoph, Eric Prydz, Jeremy Olander, Grum, and FEHRPLAY.

Produced by John Kunkel, renowned sound designer from Freshly Squeezed Samples and widely known for his work in the band The New Division, these Serum presets are perfect for the futuristic progressive house sound, or any genre that needs a retro inspired 'feel'.

Of course, all presets are normalized, rooted, and mod wheel mapped where appropriate, and all are well categorized to make finding the right sound simple and intuitive, just like you've come to expect from us.

128 Serum Presets – Craft driving basslines, atmospheric pad lines, big room plucks and more with over a hundred and fifty presets designed to deliver truly modern club sounds.

44 MIDI Files – Just as you've heard in the demo, these are complete pieces that are ready for you to mix, match, and groove. All MIDI files are organized into individual folders and named after the presets used for each individual element.

110x Stem WAV Files - Everything you hear in the demo is included, to slice up and use in your own productions.

Requirements:

- Xfer Records Serum Version 1.36b3 or Higher.
