

Containing over 128 presets per volume, the Spire Big Room Essentials Bundle features a comprehensive collection of over 640+ professionally engineered big room orientated presets. With deep big room basses, festival inspired leads, and a selection of intricately designed arpeggiated sequences, this sound set bundle is the perfect resource for any dance music producer who's looking to experiment with the popular big room sound.

Produced in collaboration with talented Dutch sound designer Jan Hinke, the Spire Big Room Essentials Bundle features all 5 volumes of the highly popular series.

You'll find driving electro basses, festival inspired leads, and a range of intricately designed arpeggiated sequences.

Both volumes feature remakes from top artists in the dance music scene, including Showtek, W&W, Martin Garrix, Dimitri Vegas & Like Mike, Calvin Harris, Hardwell, and many others.

As usual, we like to retain a level of unparalleled quality here at Freshly Squeezed Samples, which is why every single one of the presets in these three volumes is quality made. You won't find any poorly designed "filler" presets; instead, you'll have over 640+ inspirational and usable sounds.

100% royalty free.

Requirements:

Reveal Sound Spire version 1.5.11 or higher.
