One of the best and most powerful synths in EDM production is Reveal Sound's Spire.

It's a monster in creating fat, powerful EDM sounds.

We've pushed the synth to the limit and created 64 presets for your next hit tune.

These presets will lift your Spire synth to a new pro level.

In the pack you will find 64 Spire Arps, Leads, Plucks and FX presets, plus a BONUS of 8xAbleton projects featured in our demo song.

This is an easy way to see which presets were used to create the demo and use it as a valuable learning tool.

We've covered nearly every sound you'll ever want for Electro House, Progressive House, Trance, even Deep House.

This is really a monster pack of presets for all Spire users.

Please Note: These presets will only work with Reveal Sound's Spire Synth 1.0.18 or above.

The Ableton projects will only work with 9.1.2 or above.
