Add some hot summertime vibes to your music production with our freshest deep & chill house sample pack called Summer Chill House! This gorgeous set will give your tracks an inspiration and universal sound tools for shining on penthouse pool parties, beach parties, lounge clubs and even on Ibiza dance-floors. So what is this exactly and how can it be used?

The pack includes a large amount (1.5 GB+) of musical loops for creating Deep Soulful & Tropical House among which are lush keyboards & pianos, funky guitar loops, groovy sax riffs, smooth synth melodies, tropical marimbas & more. All synths & keyboards loops have midi files as usual. Beside that you can pump up your mix with industry standard punchy house drum loops. Along with all that Rex2 sliced loops are also available in the pack like always.

For those who strive for initial inspiration we offer 5 fabulous Deep, Funky & Tropical House song starters, fully detailed, mixed and volumed (including midi files). So you just need to drag-n-drop it into your DAW and start changing them to your liking.

In addition, we offer 20 selected synth presets for XFer Serum and NI Massive, 70 exclusive musical samples (deep chords, synth stabs, funky guitars, vocal chops, synths & more), and of course, 80 the most suitable drum samples, for the creation of your unique drum patterns & house drum loops. And to summarize, you'll get 20 of the most needed effects (uplifters, downlifters, white noises, impact fxs, etc.) to make your house tracks sound completely finalized.

Please note: Every sound featured in the audio demo is INCLUDED in this sample pack!
