

Inspired by the Cliff Martinez score that soundtracked Ryan Gosling's epic getaways in Drive, we bring you stacks of unique retro-style synth sounds for Spire.

Painstakingly created by the same producer behind our acclaimed Synthwave title, this follow-up puts the iconic sounds of retro electro, synth pop and new wave at your fingertips - for a fraction of the price of the hardware synths they're based upon.

Totalling 128 patches, the pack includes 11 Arps, 30 Bass, 30 Leads, 20 Pads, 30 Keys, 7 FX - all expertly programmed to create synth sounds that sound authentically old school and 80s infused.

But there's more. We've also bundled almost 50 MIDI files to spark your inspiration. The MIDI is broken down into 19 families of between 2 and 3 complimentary melodic motifs that mix bass, leads, chords and more so you can kick-start your next track.

Please note: this collection contains Spire presets and MIDI only. The demo contains drum samples not included in the pack.
