

## **'TD Audio: Future EDM' lets you experience the future of electronic dance music with this incredible collection of hard Dance audio, featuring six over stuffed production kits for you to explore the future of EDM like never before.**

Each production kit comes equipped with stems, shots and all the musical elements you hear in the demo and more.

This off the chain studio production pack includes a Fruity Loops template which offers up all the one-shots and sample tools to get your next session off the ground while using this popular DAW.

This pack does not stop with just Kits and audio, also mangled up are 51 super hot Sylenth1 patches to take your EDM riffs to new heights.

Being the sample pack freaks that they are, they even added MIDI files in case you're looking for musical parts to inspire your next creation while using these amazing presets. No stone was left unturned.

This collection and all other TD Audio sample packs are 100% Royalty-Free and can be used in any DAW. 'TD Audio: Future EDM' can also be used with other styles of electronic music like Electro, Future Bounce, Hardstyle, Big Room, Melbourne Bounce and Hard Dance. Experience the future of EDM now.
