

Unleash the power of cutting-edge sound design with Tech House Reactor by HighLife Samples, a sample pack for producers of Tech House, House, and EDM. Whether you're creating club-ready bangers or underground grooves, this collection gives you everything you need to take your music to explosive new heights.

Inside, you'll find 5 fully-loaded construction kits, carefully organised into separate folders for effortless workflow. Use them as complete song starters or break them down to craft your own unique arrangements.

Each kit includes:

- **WAV Loops:** Driving basslines, punchy drum grooves, captivating synth riffs, FX textures, and expressive vocals (dry and wet), every sound you hear in the demo is included.
- **MIDI Files:** Unlock endless flexibility by customising melodies, basslines, and chords to suit your own style. With MIDI, you can change instruments, transpose notes, or adjust rhythms with total creative freedom.
- **Drum Hits:** A versatile collection of kicks, claps, hi-hats, and percussion elements, perfect for building your own grooves from scratch.
- **Serum 2 Presets:** Professionally crafted patches that deliver the modern and bold sound of today's Tech House.

Please note: For preset's you will need Serum 2.0.19 or above.

For maximum ease of use, all samples are clearly labeled with key scale and BPM, making it simple to match loops, layer sounds, and speed up your workflow. Every sound has been professionally mixed and mastered, ensuring your tracks sound polished and club-ready straight out of the box.

Best of all, Tech House Reactor by HighLife Samples is 100% royalty-free, so you can use every sound in your personal or commercial projects without limits.
