Every producer's toolkit should include some killer vocal top-lines. These vocals can make or break a track, providing that essential hook you require to catch the ear of the listener.

With that in mind, we set out to create the ultimate vocal pack!

Tech House Vocal Chops includes 107 key-labelled vocal chop loops all at 124 BPM. Each loop has been carefully crafted, processed and trimmed. Simply drag & drop into your existing project or use as a starting point/inspiration for your next track.

We've also included all of the samples that were used to create the demo. Inside this additional content, you will find 7 construction kits. Each kit includes the separate stems for drums, percussion, bass, leads, stabs etc etc.

These kits are a great way to deconstruct how a track has been made. For instance, checking what frequency area each stem is covering, what position each one has in the stereo field or even the placement of percussion, stabs, hats etc.

A must have collection for all Tech House producers!

Inside the pack....

107 x Vocal Chop Loops // All Key labelled and 124 BPM
7 x Construction Kits (101 x WAV Loops)
