Trance Euphoria is proud to release **'Tech Trance Anthems'** featuring a superb collection of 20 x Tech Trance Construction Kits WAV, MIDI & Spire Presets.

Inspired by all the top Tech Trance artists from around the world and all the top Tech Trance festivals bringing you the best quality tools for your productions.

These songstarters give you a great start to your next track or could be a great addition to your existing projects to give you another direction or dimension to your tracks.

Kits

Each kit has three folders MIDI, Wav & Presets, the Wav folder contains all the wav stems needed to re-create what you hear in the demo for that kit, the MIDI folder contains all the melodic MIDI files for that kit to change notes or sounds when you are creating your new track and the Preset folder contains all the spire presets used with the MIDI files for each kit also the kit contains the demo mixdown of that kit.

Advantages With MIDI & Presets

With MIDI you have the ultimate flexibility being able to edit notes, velocity, etc, and assign your own sound, these are easily imported to any DAW either Drag And Drop or Import MIDI Options in your DAW.

These MIDIs are also a great source of inspiration for those writer's block moments even the pros need motivation and inspiration from time to time, you can also learn how these have been constructed and change/tweak the MIDI to your own taste.

With the included presets you have complete control and can replicate the sounds you hear and that have been rendered for you to use in each kit, you can tweak and do what you want to achieve your own sound.

About Presets In This Pack – PLEASE READ

The spire presets in this pack are **FREE** and are used as a starting point for each kit but may contain duplications or similar sounds but are included to represent the kits potential, please also note if you do not own the Spire VST Instrument the supplied WAV files are in each kit to be used instead of the included presets or you can still use any virtual instrument of your choice with your own presets or bought presets to assign the vst instrument to the MIDI files and create your own sound, by all means, use the included presets royalty-free in these kits or other productions.
