

Crate Digger's Paradise

As a sample based producer 2DEEP understands the struggles that come with it. With copyright laws getting tighter, you're always wondering if the original creator of the sample will clear your record when you go to seek clearance for it.

This is a problem, and we decided to take action: with a team of professionals we put together a full blown, 17 track album packed with complete royalty-free instrumentals that sound just like record samples for you to chop and flip to your liking!

Sounds inspired by Old Sci-Fi, horror soundtracks and progressive rock LP's making, it perfect sampling material for hip hop producers, and the best thing about it... you don't need clearance!

Let the music speak for itself, check out the audio snippets from 7 of the 17 tracks to understand why this is a gold mine for any producer.

Stay tuned for more upcoming releases by 2DEEP!
