

When I finished this pack I said “this is the best sample pack I ever made” I worked very hard for weeks to get this done and took care of the smallest aspect. I try to recreate the sound design of The Weeknd songs of course but I also try to get into his head and create something new in his style.

These sounds are inspired in the “Dawn FM” album mainly but also in other hits by Abel. If you are a Synthwave producer, just go for it! this pack will give you the best quality retro sounds out there.

If you are a producer in a different genre you probably know how much the 80s sounds dominate the market. Don't fall behind and take advantage of this moment!

Pack Contents:
