

“Trance Journey” – We continue our adventure in the world of trance. After the huge success of "Trance Expedition" for Sylenth1, we decided to pass this content on to the owner of Spire. This soundbank has been prepared very carefully and gives you everything you need in trance production. Acid, Bass, Pad, FX, Pluck and more presets created with great care.

You can test the potential of these sounds and get inspired by their example use from the included bonus project. This project is exactly what you hear in the demo. Templates are available on Ableton, Cubase, FL Studio, Logic Pro, Studio One and every DAW was mixed very carefully so as not to change the sound of presets. Same thing with mastering, which is also available in every DAW.

WHAT INSIDE:

- 64 Presets for Spire
- FL Studio Template
- Cubase Template
- Ableton Template
- Logic Pro Template
- Studio One Template
- Over 60 unique MIDIs heard in demo
- 10 Samples
