

Ultimate Trap Presets (Massive) by Apollo Sound is the second pack in an exclusive series of trap presets for your favorite virtual synthesizers. This time we have a Massive trap preset pack. Classic virtual synthesizer of all modern producers created by Native Instruments.

We have collected only the most needed and popular patterns of this genre all in one place, and added a bit of our vision of trap music in it. Here you can find 808 Bass & Glide Bases, Hard & Pitched Leads, Bleep & Screech Synths, Trap Brasses, Deep Dark & Bass Pads, Sick Effects and more.

This collection is inspired by such monsters of the genre like Diplo, Aero Chord, SayMyName, Tropkillaz, Skrillex and it will perfectly work as for Club Trap producers, so for Hybrid Trap/Trap Step production.

Here is everything to blow this trap heads off. You just need to download this Massive trap presets soundbank and drop new patches to your synth.
