

Ultimate Trap Presets (Serum) by Apollo Sound is the third pack in an exclusive series of trap presets for your favorite virtual synthesizers. This time, Serum trap preset pack, a modern workhorse that successfully bridges the sonic gap between digital and analog created by Xfer Records.

We have collected only the most needed and popular patterns of this genre (such as Serum 808 presets) all in one place, and added a bit of our vision of trap music in it.

Here you can find: 808 & Glide Basses, Hard & Pitched Leads, Bleep & Screech Synths, Trap Brasses, Deep Dark & Bassy Pads, Sick Effects and more.

This collection is inspired by such monsters of the genre like Diplo, Aero Chord, SayMyName, Tropkillaz, Skrillex and it will perfectly work as for Club Trap producers, so for Hybrid Trap/Trap Step production. Here is everything to blow this trap heads off. You just need to download this pack and upload these presets to Serum.
