

Whether you are a professional trance producer or just someone who is looking for inspiration, this pack is for you. With Uplifting Trance Stems Project Vol.3 by HighLife Samples, we have crafted and curated some of the freshest uplifting trance sounds to date and made them available for you.

Inside you will find the full WAV stems, all the melodic elements as MIDI files, and synth presets from Sylenth, Spire, and Serum.

Just import the stem files to your DAW and see how all the elements fit together to make a good-sounding track.

You can play around with MIDI files, edit them and make your own melodic ideas. Or tweak the synth presets and makes your own sounds.

Download this pack and recreate the structure of the track and make a new version to your style.

Please note: You can't export the track as it is and release it as your music composition. But feel free to use the WAV stems, MIDIS, and Synth preset's to make your own version of the track or use them as parts inside on different projects.

For synth presets, you will need: Serum v. 1.345, Sylenth v3. 067, Spire v1.5 or higher.
