'Vocal Trance' by Elevated Trance features five outstanding Vocal Trance Construction Kits WAV, MIDI & Presets.

Vocal trance is the melodic, song-oriented branch of trance that fuses sweeping synths and club-ready structures with fully written vocals, giving electronic tracks the emotional arc of pop while retaining hypnotic power.

Most vocal-trance tracks sit between 128 and 142 BPM. A standard arrangement opens with a rhythmic intro for beat-matching, builds through arpeggios and side-chained pads, pauses for an extended, often beat-free breakdown where the singer delivers verse and chorus, then erupts into a euphoric drop powered by supersaw leads, four-on-the-floor kicks and cavernous reverbs. Lyrics focus on love, heartbreak, self-discovery or transcendence, letting crowds sing along and find catharsis.

Ultimately, vocal trance endures because it marries dance music's physical rush to melody and narrative. On a festival stage, the breakdown grants thousands of dancers a collective breath before the beat returns; on headphones, it offers a private cycle of tension and release. Thirty years on, the recipe still works: a human voice striving for something bigger, lifted by shimmering pads and a relentless kick, reminding listeners that euphoria and vulnerability can share the same song.

Product Details:

5 x Full Top-Quality Vocal Trance Construction Kits.
258 x Total Files.
183 x 24-Bit Wav Files.
28 x MIDI Files.
36 x Spire Presets.
1 x Sylenth Preset.
Lyrics for each kit.
Kits 138 - 144 BPM & Key-Labelled.
891MB Zipped | 2.18GB Unzipped.
Everything is 100% Royalty-Free.

Please Use Spire 1.1.1.7 Or Higher. Please Use Sylenth 3.073 Or Higher.Please Note: Keep your software legal and up-to-date to avoid any issues when loading your new presets.
