

Trance is a great, emotional genre but with female vocal, it's a higher level. This template is a complete tool that will show you every step to achieve professional sound, vocal mixing, trance track mixing, sound design, mastering, and more.

Vocals come from Rebecca Louise Burch it's a famous singer in the trance scene so you can be sure about the quality of the vocals but even the best recording needs proper mixing so you can dive into your DAW and find out how to do this.

Technically, I also took care of the smallest detail. The project is based on the Spire and you only need this synthesizer. I tried to use only stock plugins in DAW so the project is very light, you can easily open it even on a weak PC. The project is clean and easy to learn.

Pack Contents:

- Full Track Project
- 25 Midi Files
- 23 WAV Samples
- 21 Spire Presets
-
