

If you are a trance producer, then you need to check this out. Dive into the full-track project right in your DAW. Learn every aspect of professional trance production like mixing, Vocal mixing, sound design, mastering, arrangement, writing melodies and many more.

Vocals come from Rebecca Louise Burch, it's a famous singer in the trance scene, so you can be sure about the quality of the vocals. This project shows the easiest way to produce a pro-sounding Vocal Trance song.

Technically, I also took care of the smallest detail. The project is based on the Spire and you only need this synthesizer. I tried to use only stock plugins in DAW, so the project is very light, you can easily open it even on a weak PC. The project is clean and easy to learn.
