

Freak Music proudly presents the "Vocalise" - a huge collection of vocal samples and one-shots, useful chants and mesmerizing chops. This product will become your number one source in creating music with vocal chops. This immense product is absolutely innovative - we have included three keys in six octaves for every single vocal instrument. That means you can use these samples in your productions without a pitch-changing effect! All of these chops have the same length, so you can choose which octave and key is the best for you and easily drag & drop it in your DAW or split and splice and play on your MPC.

The biggest advantage of multi-octave samples is that you can use individual samples as an instrument - without modification on the length and structure of the vocal sample. You can use them in your commercial productions 100% Royalty-Free, without having to pay any hidden costs. They are delivered as 44.1 kHz 24-bit WAV, so will work with absolutely every DAW on the market. Isn't that wonderful?

**Features:**

- 50 vocal instruments
- 900 vocal samples in total
- Includes 3 keys over 6 octaves
- 1,70 GB of unzipped content
- 44.1 kHz, 24-bit WAV
