

Freak Music is proud to present the next volume of a glorious sample pack - "**Vocalise 3**". Carefully chosen vocal samples, one-shots, useful chants, reverbed chops is a essence of this collection. This product will become your number one source in creating music with vocal chops. Absolutely innovative system - we have included three keys in six octaves for every single vocal instrument. That means you can use these samples in your productions without a pitch-changing effect, so choose the best octave and key for your track and easily drag & drop them into your DAW or split and splice and play on your MPC.

The biggest advantage of multi-octave samples is using individual samples as an instrument - without modification on the length and structure of the vocal sample. You can use all of the 900 samples in your commercial productions 100% Royalty-Free, without having to pay any hidden costs. They are delivered as 44.1 kHz 24-bit WAV, so work with absolutely every DAW on the market. Usable in more projects and genres than you can imagine.

Features:

- 50 vocal instruments
- 900 vocal samples in total
