

W. A. Production is proud to present you „What About: Chill Vocals Universe“, an exclusive 3,6 GB huge sample pack loaded with all of the tools that you will ever need to create your own chilled tune or to get inspired in multiple ways.

This sample pack is a perfect example of a quality vocal pack. This pack brings you 8 full-length Construction Kits that are packed with contents like;

- Lead Vocals / Backing Vocals / Adlibs & More
- Lyrics
- Full Instrumental Construction Kits
- MIDI

For instrumentals we used kits from our „What About: Flumed Future Bass“ sample pack.

The Kits provided in this amazing vocal pack are in a variety of different tempos ranging from 120 – 160 BPM. We did this because the vocals fit over the Future Pop / Future Bass genres, so the Kits are pushed in the tempos of those genres. The Kits also range in a variety of different keys. This is simply done to add change and diversity in the vocals and Kits and so you as the producer can possibly find a set of vocals that fits your tracks key.

„What About: Chill Vocals Universe“ is the pack for you if you are one of the many producers in the world sitting at a project and thinking you need a great set of vocals to amp the track up. With this pack, you will have a supply of amazingly high quality vocals to choose from that will bring an amazing and tasteful atmosphere to your next project.
