

We are calling out to all you headbangers. Give your Dubstep a little something extra. Check out Dubstep Muscle from W. A. Production. Get ready to experience a supersonic powerhouse of sound. We are giving you harder hits, bone-chilling progressions, melodic build-ups, heavy-hitting drops, and crisp alterations that are sure to catch anyone that thinks they know what will come next by surprise.

If you are not familiar with Construction Kits they are a great tool for professionals on the go, beginners learning about song structure and audio production, or those looking to stay current on multiple genres.

Our top-notch producers have designed the demo track you will hear in each kit. Inside the kit, you will find every sample, preset, MIDI trigger, and plugin used to create the track. Not only is it broken down into one hits. Each track has been broken down layer by layer in its entirety. This gives you full control to piece it together, modify, and create your own track. You will be able to see the advanced techniques they used in order to obtain a high-value production.

Ever wonder how they make a heavy-hitting wobble or face-melting bassline? Or how top producers get such amazing drum sounds? It's all in Dubstep Muscle from W. A. Production.
