

It's time to turn up that hot summer heat with Reggaeton from W. A. Production. Inspired by such artists as Nicky Jam, Maluma and Ozuna, this pack provides a sleek and sexy sound that is sure to keep the hips in motion and bring out the most primal instinct. With a blend of hip hop, Latin and Caribbean you'll be able to create Reggaeton, Moombahton, Tropical Bass, Hip Hop, and Tropical House style tracks.

Taking its origins from Dembow and drawing inspiration from Jamaican riddims, once you hear the "pop" of that infamous snare and addictive tropical style groove, you'll be ready to dive right into any of the 5 hit-making construction kits. The construction kits in this pack are designed to show you the importance of each sound used and its role in creating a Reggaeton track.

As you begin to construct a complete track you won't feel limited to the use of only the sounds in the track. We have included additional interchangeable sounds such as strong sub-bass, tight kicks, marcato strings, wide snares as well as brilliant percussion-like hi-hats, snares, claps, bongos, congas, and cymbals.

If you want to set the mood to a high energy beach party or a sultry summer night wind down under the palm trees, you want the sound that fuses the Caribbean, Mediterranean, Latin American other coastal influences. Give your next mix some extra spice for those hot summer nights, pick up W. A. Reggaeton from W. A. Production.
