

Inspired by today's chart-topping future pop artists such as VNV Nation, Icon of Coil as well as future bass artists Flume and Marshmello, Future Pop Ghost from W. A. Production gives you the sounds you need to create beautifully and impacting tracks.

This pack includes arpeggios with complementary bass lines and leads. MIDI sequences, so you can see how the pros compose and construct a seamless mix. From organic to electronic sounds, sharp synths to mystical pads.

Choose from 3 Construction Kits that include more than the other packs you'll find out there. We are giving you both wet/dry side-chained and non-side-chained stems, as well as drop sequences.

In addition to the Construction, Kits stems, you will find additional audio sample one-shots and loops. These range from full drum kit loops (with kick included), hi-hat patterns and one-shots, percussive loops and one-shots. With so many choices of downlifters and uplifters, you can control how to build it up and wind it down.

We want to offer not only a pack of stems for a remix, but a way to truly make it your own by including additional corresponding sounds that will fit just as perfect as pieces of a puzzle.

If you need the sounds used to make future pop with future bass attributes, you'll find a complete collection that will not only inspire your creativity but give you the results you need to submit to a label, playlist, or album release.

Our quality can't be beaten and the power of our melodies is nothing short of addictive. Pick up Future Pop Ghost from W. A. Production and give your creative voice the sounds that deserve to be heard.
