

Are you ready? This pack is designed to give you the sounds that you need to create the most infectious, danceable and riveting progressive house tracks ever. Progressive House Plasma from W. A. Production is exploding with colorful character and energetic sounds. Sharp and straight forward synth stabs, tight cymbals, tropical plucks, sensational bass groove, deep snares and plenty of euphoric effects and robust percussion.

Progressive House Plasma lets you grab a hold of that signature European electronic sound, signature drum rolls, powerhouse leads, and every element at your command to make some seriously mind-bending break downs.

If you enjoy vivid textures, throbbing bass-lines, and a style that will enhance your sound, energize your experience and uplift your creativity, this pack will be your electronic savior.

All of you FL Studio enthusiasts, we have included 6 of our project files that include full tracks. Every sound, every knob tweak, setting and preset we used to create, shape, mix, and master is yours to reshape and manipulate.

You don't have FL Studio? That is o.k. Each track has also been broken down into stems. Even if you don't have the synths we used, you can still access the MIDI sequence and apply it to any instrument that you want.

Of course, we don't want to hold you back or limit your options, so we also have included additional one-shots, melody loops, and presets for both Serum and Sylenth1. We want to inspire your creativity and give you all the tools you need to make your audio composing dreams come to life. If you want top-quality audio samples that will sound great in the car and the club, pick up Progressive House Plasma from W. A. Production and let the creativity begin.

Inspired by such artists as Alesso, Jay Hardway, Nicky Romero, KSHMR and more.
