

What About: Synthwave Arcade 2 from W. A. Production is the follow up to our highly successful What About: Synthwave Arcade release. We dove even deeper and researched the classic sounds used in the '80s. This means you get authentic samples and loops that sound like they came straight from a DX7 or Roland drum machine. The only difference, we applied modern sound design techniques and equipment to revitalize those sounds and have brought them up to today's audio quality standards.

Inspired by such artists as Yaz, Depeche Mode, Com Truise, Dance with the Dead, Perturbator, and Time Cop. With What About: Synthwave Arcade 2 you'll be able to create retrowave, synthwave, vaporwave, chillwave, and outrun.

Why go out and try to find all of that vintage gear when you can have all of those same sounds in one pack. We've included those over the top tom sounds in loops and one-shots, airy and heavy snares, deep kicks, sparkling arpeggios, vintage beats, rolling analog bass, and of course, soaring leads. You'll also find uplifters, sweeps, and plenty of retro-futuristic effects.

Choose from our melody loops or make your own. We've included our Serum presets so that you can design your own chord progressions or lead riffs.

Take your analog sounds into the digital future. Create the perfect rhythmic structure and cruise into the neon night with What About: Synthwave Arcade 2 from W. A. Production.
